

What Does a Delivery Cost?

We provide this sheet so that you know what it takes to professionally deliver your packages. If another company is **low bidding**...Chances are they are **making it up in miscellaneous fees or reduced service** by delivering packages when it's convenient and profitable for them. Don't be fooled by these practices. Nobody can operate at a loss 100% of the time and remain in business.

Go ahead and fill in some of the blanks...We've done the lowest allowed by law for you. Then check your current contract and give us a call. We'd be thrilled to partner with you.
